

Bui Minh Anh (Alex Bui)

Cloud & Infrastructure Automation Engineer

Hanoi, Vietnam | Open to Relocation | minhnh.alex.7@gmail.com | linkedin.com/in/alexbui7

SUMMARY

Infrastructure engineer with 3+ years of software and platform experience, building automation-first cloud platforms for regulated, large-scale environments. Designed the foundations of a multi-cloud enterprise data and ML platform (AWS + Databricks) covering IaC, CI/CD, secure networking, and cost/performance benchmarking. Strong at turning ambiguous requirements into measurable engineering criteria, and at aligning engineering teams, vendors, and leadership on technical strategy.

TECH STACK

Languages: Python, C#/.NET, Java, SQL

Infrastructure & Automation: Terraform, Databricks Asset Bundles, GitLab, Docker, Git

Cloud & Networking: AWS, Azure, Databricks, Linux, Windows

ML & Data Platforms: MLflow, AWS SageMaker, Databricks model serving

Security & Governance: Entra ID, AWS IAM, SSO/SCIM, FinOps, observability

PROFESSIONAL EXPERIENCE

Software Engineer

2023 – Present

Vietcombank, Hanoi, Vietnam

- **AWS platform architecture:** Design and implement the AWS cloud data platform architecture for ODP, covering multi-account structure, networking, security, and platform governance.
- **Databricks platform:** Architect and manage the Databricks platform on AWS, including workspace architecture, Unity Catalog, compute, identity, access control, and environment separation.
- **Private connectivity:** Design secure private connectivity between enterprise networks, AWS, and Databricks using Direct Connect/VPN, Transit Gateway, Firewall, PrivateLink, VPC endpoints, and Route 53/hybrid DNS.
- **IAM & security:** Design IAM roles and groups integrating Microsoft Entra ID with Databricks SSO/SCIM, service principals, RBAC, secrets management, and environment-specific access controls.
- **IaC & CI/CD:** Develop Infrastructure-as-Code using Terraform and Declarative Automation Bundles (DAB) for consistent deployment across environments. Develop CI/CD standards for Python, DAB ETL workload across the platform.
- **Governance & FinOps:** Define Databricks governance and cost-management controls, including compute policies, resource governance, usage monitoring, tagging, and cost allocation.
- **Cross-team delivery:** Collaborate with Data Engineering, Infrastructure, Security, Architecture, and external vendors to translate business and technical requirements into implementable cloud solutions.
- **Documentation:** Produce and review solution architecture, technical specifications, BOMs, deployment standards, and implementation plans for the ODP platform.

Junior Software Engineer

2021 – 2023

Fathom Applications Pty Ltd, Queensland, Australia

- Refactored legacy monolithic systems into modular architectures using Clean Architecture, improving testability and maintainability.
- Developed backend features in C#/.NET in close collaboration with product and UI teams.

Software Engineer Intern

2019 – 2020

Vingroup Advanced Analytics, Hanoi, Vietnam

- Integrated Azure Data Factory workflows into CI/CD pipelines to enable reliable pre-production test environments.
- Built a Python SDK for automated notebook deployment, reducing manual effort and improving reproducibility.

EDUCATION & CERTIFICATION

Bachelor of Computer Science (Distinction), Queensland University of Technology

2019 – 2021

Dean's List: Excellent Academic Performance

Microsoft Certified: Azure Solutions Architect Expert AZ-305 (2026)

Microsoft Certified: Azure Administrator Associate AZ-104 (2025)
