📍 Hanoi, Vietnam — open to relocation

🌐 alexbui7

🔗 alexbui7

Summary

Infrastructure engineer with 3+ years of software and platform experience, building automation-first cloud platforms for regulated, large-scale environments. Designed the foundations of a multi-cloud enterprise data and ML platform (AWS + Databricks) covering IaC, CI/CD, secure networking, and cost/performance benchmarking. Strong at turning ambiguous requirements into measurable engineering criteria, and at aligning engineering teams, vendors, and leadership on technical strategy.

Experience

Vietcombank, Software Engineer

Hanoi, Vietnam

Building ODP, the bank's enterprise cloud data and ML platform on AWS and Databricks.

2023 – present
3 years

- AWS platform architecture: multi-account structure, networking, security, and platform governance.
- Databricks platform: workspace architecture, Unity Catalog, compute, identity, access control, and environment separation.
- Private connectivity: Direct Connect/VPN, Transit Gateway, Firewall, PrivateLink, VPC endpoints, and Route 53/hybrid DNS.
- IAM & security: Microsoft Entra ID integrated with Databricks SSO/SCIM, service principals, RBAC, and secrets management.
- IaC & CI/CD: Terraform and Databricks Asset Bundles across environments; CI/CD standards for Python and ETL workloads.
- Governance & FinOps: compute policies, resource governance, usage monitoring, tagging, and cost allocation.
- Cross-team delivery with Data Engineering, Infrastructure, Security, Architecture, and external vendors.
- Solution architecture, technical specifications, BOMs, deployment standards, and implementation plans.

Fathom Applications Pty Ltd, Junior Software Engineer

Queensland, Australia

- Refactored legacy monolithic systems into modular architectures using Clean Architecture, improving testability and maintainability.
- Developed backend features in C#/.NET in close collaboration with product and UI teams.

2021 – 2023
2 years

Vingroup Advanced Analytics (Vantix), Software Engineer Intern

Hanoi, Vietnam

- Integrated Azure Data Factory workflows into CI/CD pipelines to enable reliable pre-production test environments.
- Built a Python SDK for automated notebook deployment, reducing manual effort and improving reproducibility.

2019 – 2020
1 year

Education

Bachelor Queensland University of Technology, Information Technology (Computer Science)

Brisbane, Australia

- Awarded with Distinction (August 2021)
- Dean's List: Excellent Academic Performance

2019 – 2021

Certificates

Microsoft Certified: Azure Solutions Architect Expert (AZ-305)

May 2026
